

# LIGHT & SPACE

## ROOF SYSTEMS

The AB Bar locks the Danpalon polycarbonate sheets together and allows free thermal movement of the sheets—no screw fixings. Expansion noises are eliminated and the system is strong enough for cyclonic conditions.

The AB Roof System is lightweight and very strong.

Made from aluminium, the AB Bar is patented—Innovation Patent No. 2005100256.

All posts and beams are manufactured from Duragal steel.

**The Light & Space AB Roof System is the BEST polycarbonate roof framing system in Australia—our spans cannot be matched.**
